

Curved Situations: Top-mounted option (Spigot)

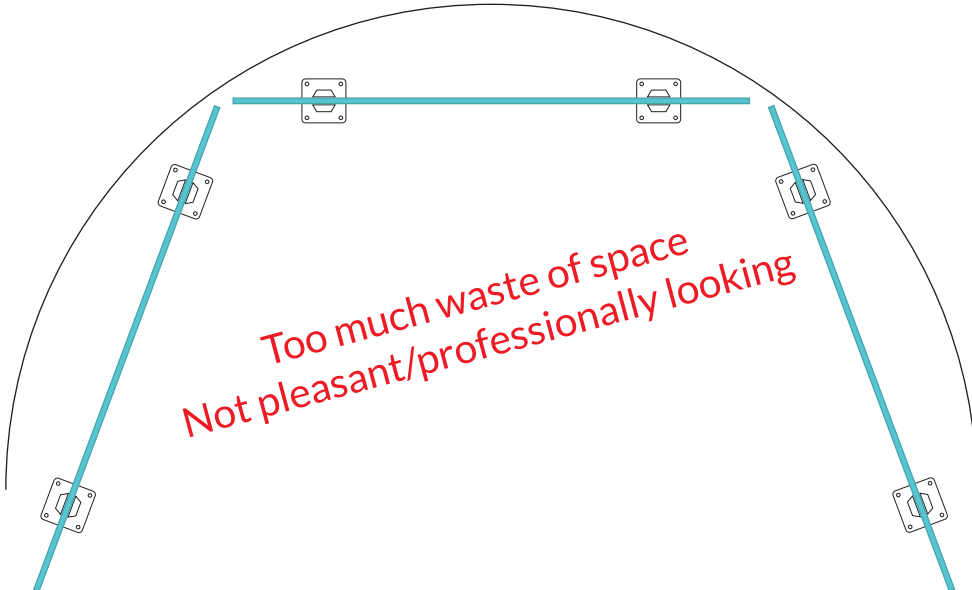

STRAIGHT LINE  
(standard)

SLIGHT CURVE  
(Might be feasible using straight glass panels)

SHARP CURVE (or spiral)  
(Not suited for glass railings using straight glass panels)

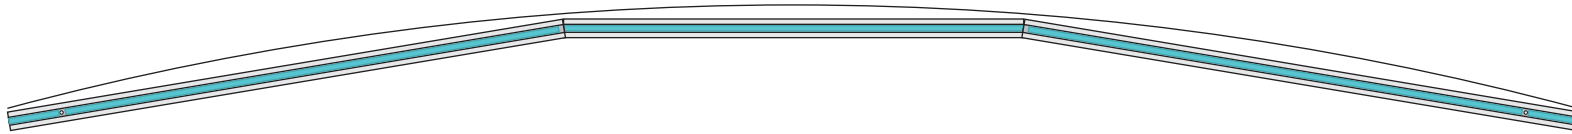

Too much waste of space  
Not pleasant/professionally looking

STRAIGHT LINE  
(standard)

SLIGHT CURVE  
(Might be feasible using straight glass panels)

SHARP CURVE (or spiral)  
(Not suited for glass railings using straight glass panels)

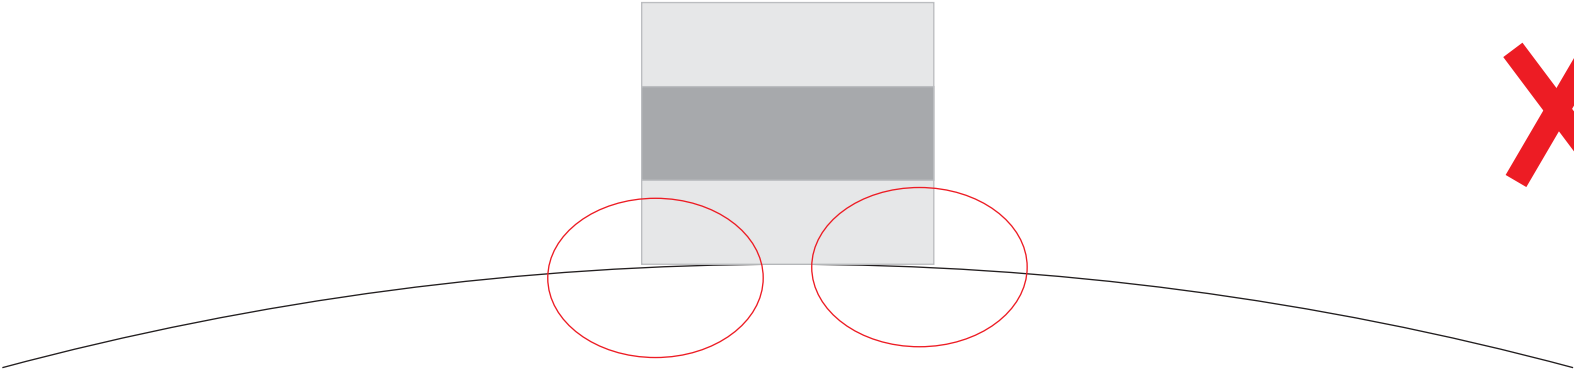

*Too much waste of space  
Not pleasant/professionally looking  
Excessive cutting*

Curved Situations: Side-mounted (any options)

---

Hardware (of any kind) won't be installed flat on the curved fascia.

There's no alignment between hardware in order to install the glass.
